Glenn Black (1937)

An archaeological survey to determine the locations of prehistoric villages, trails, burial grounds and mound groups in the St. Joseph river valley was begun this week by Glenn A. Black, of Indianapolis, director of archaeology for the Indiana Historical Society.

Mr. Black will remain in South Bend this summer to search for pre-Columbian sites. He will tour areas highly developed in the valleys of the Illinois river in Illinois and the Grand river in Michigan. His theory is that many early Indian groups around the Chicago area were highly developed and if possible to identify the most ancient inhabitants.

With the completion of the state survey the Indiana Historical Society will publish the findings. The work is difficult, Mr. Black said, because modern cities in many instances are built on the exact sites of prehistoric villages.

Perry Fry opened his new resort, "Springbrook park," yesterday. It is situated on the south bank of the river on Springbrook farm, half way between this city and Mishawaka, nearly opposite Condon's park, and is destined to become a favorite resort for pleasure-seekers during the summer season.
