

SHAARD & IHBBC Map: Finding Historic Structures in Your APE

Caitlin Lehman, Historic Structures Reviewer

SHAARD

IN.gov **SHAARD**

Welcome to SHAARD

The Indiana State Historic Architectural and Archaeological Research Database (SHAARD) allows users to search cultural resource information on known historic and archaeological resources throughout Indiana. The data contained in SHAARD was collected from previously conducted cultural resource inventories, National Register nominations, and cultural resource management projects.

The quality of the data varies with the completeness and precision of the original records and may be out-of-date. Absence of data does not necessarily indicate the absence of resources. The SHAARD is an ongoing initiative, and the associated data will undergo staged enhancements and constant updating.

THE ACT OF CHECKING SHAARD DOES NOT RELIEVE THE USER OF COMPLYING WITH APPLICABLE LOCAL, STATE OR FEDERAL LAWS AND REGULATIONS. Furthermore, the majority of properties included in SHAARD are privately owned and are not open to the public. Please respect property owners' privacy.

Users are encouraged to notify the DHPA about additions or corrections that may be necessary at SHAARDAdmin@dnr.in.gov. Please include references or other documentation to substantiate requested changes or additions. New sites will be added to the database as they are received.

SHAARD was made possible with financial support from the Federal Highway Administration, the Indiana Department of Natural Resources, and the Historic Preservation Fund of the U.S. Department of the Interior, National Park Service.

Web access to all of the historic resource data is open to the public, except for archaeological information.

[Enter SHAARD as a guest](#)

Access to archaeological site locations and detailed site information is restricted and password protected and will be granted to qualified individuals who meet the Secretary of the Interior's Professional Qualification Standards with a specialty in prehistoric, historic and/or underwater archaeology or geomorphology. Access will be granted to individuals, not companies.

IN.GOV **SHAARD**

Welcome to SHAARD

The Indiana State Historic Architectural and Archaeological Research Database (SHAARD) allows users to search cultural resource information on known historic and archaeological resources throughout Indiana. The data contained in SHAARD was collected from previously conducted cultural resource inventories, National Register nominations, and cultural resource management projects.

At this time, there is not a GIS component to SHAARD. The DHPA is currently digitizing site locations through different initiatives and hopes to have a GIS component of SHAARD available in the future.

The quality of the data varies with the completeness and precision of the original records and may be out-of-date. Absence of data does not necessarily indicate the absence of resources. The SHAARD is an ongoing initiative, and the associated data will undergo staged enhancements and constant updating.

THE ACT OF CHECKING SHAARD DOES NOT RELIEVE THE USER OF COMPLYING WITH APPLICABLE LOCAL, STATE OR FEDERAL LAWS AND REGULATIONS. Furthermore, the majority of properties included in SHAARD are privately owned and are not open to the public. Please respect property owners' privacy.

Users are encouraged to notify the DHPA about additions or corrections that may be necessary at SHAARDAdmin@dnr.IN.gov. Please include references or other documentation to substantiate requested changes or additions. New sites will be added to the database as they are received.

SHAARD was made possible with financial support from the Federal Highway Administration, the Indiana Department of Natural Resources, and the Historic Preservation Fund of the U.S. Department of the Interior, National Park Service.

Web access to all of the historic resource data is open to the public, except for archaeological information.

History of the Indiana Historic Sites & Structures Inventory

- Began in the late 1970s
- Generally, on a county-by-county basis
- All 92 counties have been surveyed

Other Surveys & Data

- National Register of Historic Places
- Cemetery & Burial Ground Registry
- Historic Theaters
- Underground Railroad
- Jewish Heritage
- Historic Bridges
- ...more to come

Understanding the IHSSI, Interim Reports, & SHAARD

- IHSSI includes properties 40+ years old at the time of the survey
- Scattered sites
- Districts (surveyed vs. listed)
- Rating System
 - **NC** – Non-Contributing
 - **C** – Contributing – not individually eligible for listing on the National Register
 - **N** – Notable – further research may reveal that the property is eligible for listing on the National Register
 - **O** – Outstanding – listed or potentially eligible for listing on the National Register

IHSSI Number Breakdown

First Three Numbers: County Code

Second Three Numbers: Quad Map

Last Five Numbers:

- Township/Town/District
- Resource Number

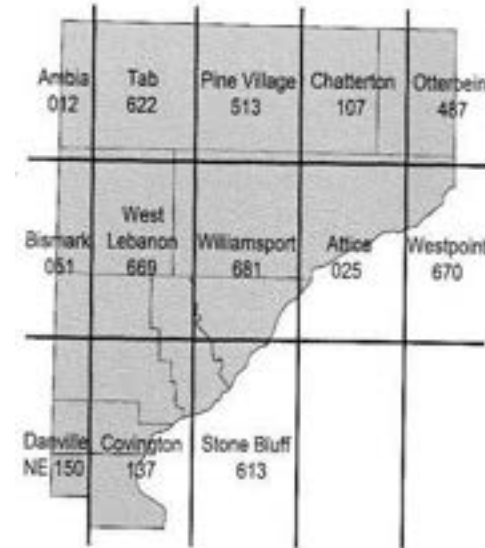

Fig. 3 USGS Quad map overlay

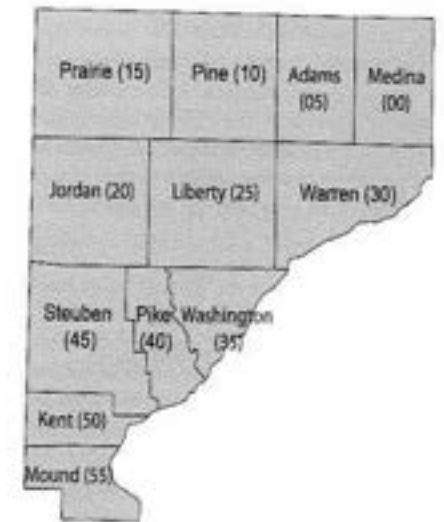

Fig. 4 Warren County township numbering

Indiana State Historic Architectural & Archaeological Research Database (SHAARD)

<https://www.in.gov/dnr/historic-preservation/help-for-owners/national-and-state-registers/shaard-database/>

- Anyone can access above-ground data – preservationists, consultants, city/county officials, property owners, genealogists, etc.
- Includes County Survey, Cemetery Registry, Historic Bridges, Theaters, & National Register of Historic Places listings

Things to Keep in Mind

- If we find an error, we fix it. SHAARD is more up to date than the Interim Reports!
- Site numbers for resurveys of counties in IHSSI differ from the first interim report survey numbers
- With IHSSI, we still survey on a county basis but information gets imported into SHAARD on a township basis
- Change in Survey Methodology

IHSSI & Changes in Methodology

Starting in 2017, the DHPA made some key changes to its electronic survey program. At that point, all new surveys undertaken by the DHPA will document Outstanding and Notable-rated properties in addition to every property in identified historic districts, all bridges, and all cemeteries. Contributing rated resources outside of those categories will not be surveyed.

To date, this currently only affects Allen County.

State Historic Architectural and Archaeological Research Database and Structures Map (SHAARD)

- **Indiana Historic Buildings, Bridges, and Cemeteries Map**

Access SHAARD here.

The Indiana State Historic Architectural and Archaeological Research Database (SHAARD) of the Division of Historic Preservation & Archaeology (DHPA) allow information on known historic resources throughout Indiana. The data contained in SHAARD was collected from previously conducted cultural resource investigations, State Register listings, research projects, and cultural resource management project reports.

SHAARD includes data from the IHSSI (County Survey Program), the Indiana Cemetery and Burial Ground Registry, historic bridges, properties in the National Historic Places, properties in the Indiana Register of Historic Sites and Structures, and historic theaters in Indiana. Access to archaeological site locations and information is available through the SHAARD database.

The quality of the data varies with the completeness and precision of the original records and may be out-of-date. In addition, there are more than 250,000 surveys located in the office. Not all data is yet inputted into SHAARD. More information is being entered daily. The absence of data does not necessarily indicate the absence of resources.

The majority of properties included in SHAARD are privately owned and are not open to the public. Please respect property owners' privacy.

The screenshot shows the DHPA IHBC Public App interface. The app title is 'DHPA IHBC Public App' and the subtitle is 'Division of Historic Preservation and Archaeology'. A splash screen is displayed over a map of Indiana, containing text about the IHBC Map and its relationship to the SHAARD database. A red box highlights the 'OK' button at the bottom right of the splash screen.

IHBBC Map Tips:

- Survey Points for Morgan, Johnson, Marion, and Hancock Counties are on the IHBBC map but are not entered into SHAARD
- If layers are not showing, zoom in further
- A single property may have more than one survey point
 - i.e. A historic bridge which is listed on the National Register may have up to 4 points for County Survey, National Register, Historic Bridge Survey, and Select or Non-Select Rating from the INDOT Historic Bridge Inventory
- Historic Districts which are surveyed and not listed can be tricky to identify on the IHBBC map
 - Look for concentrated groupings of dots
 - Non-contributing properties (blue points) are only surveyed in historic districts

Accept Terms and Conditions

- 1) I understand and agree that the confidential information contained in SHAARD may not be released to unauthorized individuals or organizations. Confidential information includes, but is not limited to, locational information for all archaeological sites and locational information for owner-restricted National Register property listings.
- 2) I understand and agree that the data available through SHAARD is not complete, may be inaccurate, and may be modified as new information is prepared for inclusion in the database.
- 3) I understand and agree that SHAARD contains information from archaeological and historic properties that are under the jurisdiction, ownership, and/or under the control of other entities, such as state and federal agencies, private individuals, and tribal governments. Said properties may be afforded additional levels of legal protection related to the restrictions on cultural resource information. I agree to use SHAARD information only in compliance with applicable municipal, county, state, tribal or federal laws and regulations.
- 4) I understand and agree that the absence of information contained in SHAARD concerning cultural resources in a particular location does not necessarily indicate that no such resources exist in said location. I also understand and agree that the absence of information concerning cultural resources in a particular location may be due simply to a lack of survey investigations of said location.
- 5) I understand and agree that the inclusion of a resource in SHAARD does not imply that it has special standing with the programs of the Division of Historic Preservation and Archaeology, unless it has been officially recognized by the National Park Service through listing in the National Register of Historic Places. I also understand and agree that properties included in SHAARD are not necessarily assured grants and/or any other public assistance and/or legal protections.
- 6) I understand and agree that access to SHAARD does not constitute permission to enter onto or conduct archaeological investigations on any land for which cultural resource records are maintained in the inventory. I further understand and agree that it is my responsibility to obtain written permission from appropriate municipal, county, state, federal or tribal officials, or private property owners, before instituting any archaeological or cultural resource investigations on, or related to, their lands. Copies of the products of such research should be sent to appropriate officials or landowners, and all permit terms and conditions must be honored.

I accept the above terms and conditions.

SHAARD Search Tips

- Use broad search terms – less specific is good!
- Check your spelling
- If you can't locate a record, try different searches
 - i.e. Historic Name Y.M.C.A. and YMCA will not yield the same search result
- Variation in Street Abbreviations can limit searches
 - i.e. When searching for a property on Bethel Avenue, try searching “Bethel,” not “Bethel Avenue,” “Bethel Ave.,” or “Bethel Ave”
 - Street numbers may or may not be input into the SHAARD record, especially for rural addresses
- Properties may have more than one historic name, and may be surveyed under a different name than it is locally known
 - i.e. Cornerstone Center for the Arts is surveyed as “Masonic Temple”

Your search does not return any records.
